*Quality Home Heating Products*

To: AmeriVent Direct Vent  
From: HearthStone  
Date: May 2, 2012

The stove models listed below are qualified for use with AmeriVent Direct Vent venting components. The vent components must be installed in accordance with the specific venting manufacturers installations instructions.

Bari	Model #8180
Bristol DX	Model #8762
Champlain	Model #8301
Luno	Model #8160
Modena	Model #8140
Sterling	Model #8532
Stowe	Model #8321
Tribute	Model #8050
Tucson DX	Model #8702

When using AmeriVent Direct Vent as an acceptable venting system, follow the same system layout, clearance to combustibles and other guidelines as currently included in our main installation instructions for the above referenced appliances. The AmeriVent Direct Vent installation instructions are included with all AmeriVent Direct Vent terminations and provide clarification on how certain parts/pieces are assembled, but do not give specifics on system layout options. Follow both sets of instructions.
