The stove models listed below are qualified for use with Selkirk Model Direct-Temp™ venting components. The vent components must be installed in accordance with the specific venting manufacturing installations instructions.

Bari	Model #8180
Bristol DX	Model #8762
Champlain	Model #8301
Luno	Model #8160
Modena	Model #8140
Sterling	Model #8532
Tribute	Model #8050
Tucson DX	Model #8702

When using Selkirk Direct-Temp™ as an acceptable venting system, follow the same system layout, clearance to combustibles and other guidelines as currently included in our main installation instructions for the above referenced appliances. The Selkirk Direct-Temp™ installation instructions are included with all Selkirk Direct-Temp™ terminations and provide clarification on how certain parts/pieces are assembled, but do not give specifics on system layout options. Follow both sets of instructions.

Available is a cross-reference chart for the Selkirk Direct-Temp™ system versus the system currently referenced in our instructions.
